

LET US HELP With Your Product Testing

iHUT

Symmetric's suite of online panels have been completing iHUT studies for more than 20 years. Our completion rates are tops in the industry, saving you time and money. With every iHUT or diary study, you will work with project directors who have extensive experience with this methodology. Our panel members understand what is expected of them and deliver quality results.

Our panels are screened periodically for product/service usage, covering such topics as car ownership and type, shopping habits, eating-out habits, beverages used, pet ownership, medical ailments, and credit cards owned. Symmetric carefully tracks surveys by topic/category. Panelists who participate in a study on a particular product category can be excluded from participating in a study for the same category.
